

MCC Infant Schedule

Our Infant Program strives to provide **predictable and consistent routines based on each infant's individual needs**. We recognize and value the need for play as being a vital part of the daily routine and essential to infant's learning and development. We choose a variety of interesting developmentally appropriate toys for infants to explore and we arrange the environment to allow for unrestricted and safe movement. Our screened porch provides a place for daily outdoor play time and four-seated strollers for trips to the field. Music, books, finger puppet plays are a part of our language-rich daily play experiences. Exposure to sign-language throughout the daily routine provides each infant with the ability to express their needs or wants. Sensory experiences and exploration of art materials are a regular part of our routine, as well as opportunities to experience parts of our expanding natural science program.

(Children are fed and changed based on their individual needs.)
